

# Safety, Health, Environment and Quality Policy

DSRL is contracted by the Nuclear Decommissioning Authority to carry out decommissioning and environmental restoration work at Dounreay Nuclear Site. DSRL is wholly owned by Cavendish Dounreay Partnership and is committed to creating a working environment which enables everyone at site to return home safe every day.

In delivering our decommissioning work we recognise that we will have an impact on the site, and surrounding environment, and that health and safety risks will arise. We therefore accept as our moral duty the need to take all practical steps to prevent harm to anyone, the environment, and our customer's assets.

We all have a responsibility to achieve continued and sustainable improvement in health, safety, environmental and quality performance at Dounreay. Further to this we have a collective and moral responsibility to co-operate with each other in order to prevent injury to ourselves, and others affected by our work, and to help improve our environmental and quality performance.

## It is therefore our priority and policy to:

- Minimise risk to everyone.
- Minimise the environmental impact of our activities
- Sustainably exceed the expectations of our customers and stakeholders.

## In order to realise these policy aims, we will:

- Foster an industry best SHEQ culture through the right personal attitudes and behaviours in a supportive work environment using effective processes.
- Comply with all the applicable health, safety, environment and employment legislation and international treaties.
- Raise any SHEQ concerns with line managers before commencing any work.
- Continually improve our safety, health, environment and quality performance.
- Make effective and efficient use of our customer's funding.
- Establish and resource improvement plans with challenging and measurable objectives and targets.
- Expect the co-operation and commitment of everyone on, or connected with, the site in delivering improved performance.
- Work positively with all our regulators, our customer and all other stake holder organisations and individuals; strive to understand their needs and meet their requirements.

This policy is implemented to all our activities through the ongoing development and implementation of an integrated and documented Health, Safety, Environment and Quality Management System that meets the requirements ISO 9001, ISO 14001, BS OHSAS 18001, HS (G) 65 and IAEA GS-R-3.

This policy should be prominently displayed, communicated to all persons on site and is made available to the public.

**Phil Craig**  
Managing Director  
Dounreay Site Restoration Ltd.
